Hello, It's Me

Bindushree S N

And I'm a Python Developer

I'm an AI enthusiast currently pursuing my studies and interning at WizzyBox. Passionate about machine learning, deep learning, and building intelligent systems that solve real-world problems.

About Me

Python Developer

I'm an AI student currently interning at WizzyBox, where I'm gaining hands-on experience in artificial intelligence and machine learning. My journey in AI is driven by curiosity and passion for creating intelligent solutions.

I specialize in deep learning, computer vision, and neural networks. Currently exploring how AI can transform healthcare through projects like medicinal plant classification using CNNs.

More About Me

My Expertise

Machine Learning

Deep Learning

AI Development

Building intelligent ML models using TensorFlow, Keras, and PyTorch for real-world applications.

Working with neural networks, CNNs, and advanced deep learning models for computer vision and image classification.

Building intelligent systems and implementing AI solutions using Python, TensorFlow, and modern ML frameworks.

My Skills

Python 70%

Machine Learning 25%

Deep Learning 50%

HTML 25%

CSS 25%

SQL 50%

Latest Project

Medicinal Plant Classification using CNN

Developed an intelligent deep learning system that accurately identifies medicinal plants using Convolutional Neural Networks. This project aims to make traditional medicinal knowledge more accessible while reducing the risks of plant misidentification.

Python TensorFlow Keras CNN OpenCV
